# Personal freedom, corporate control

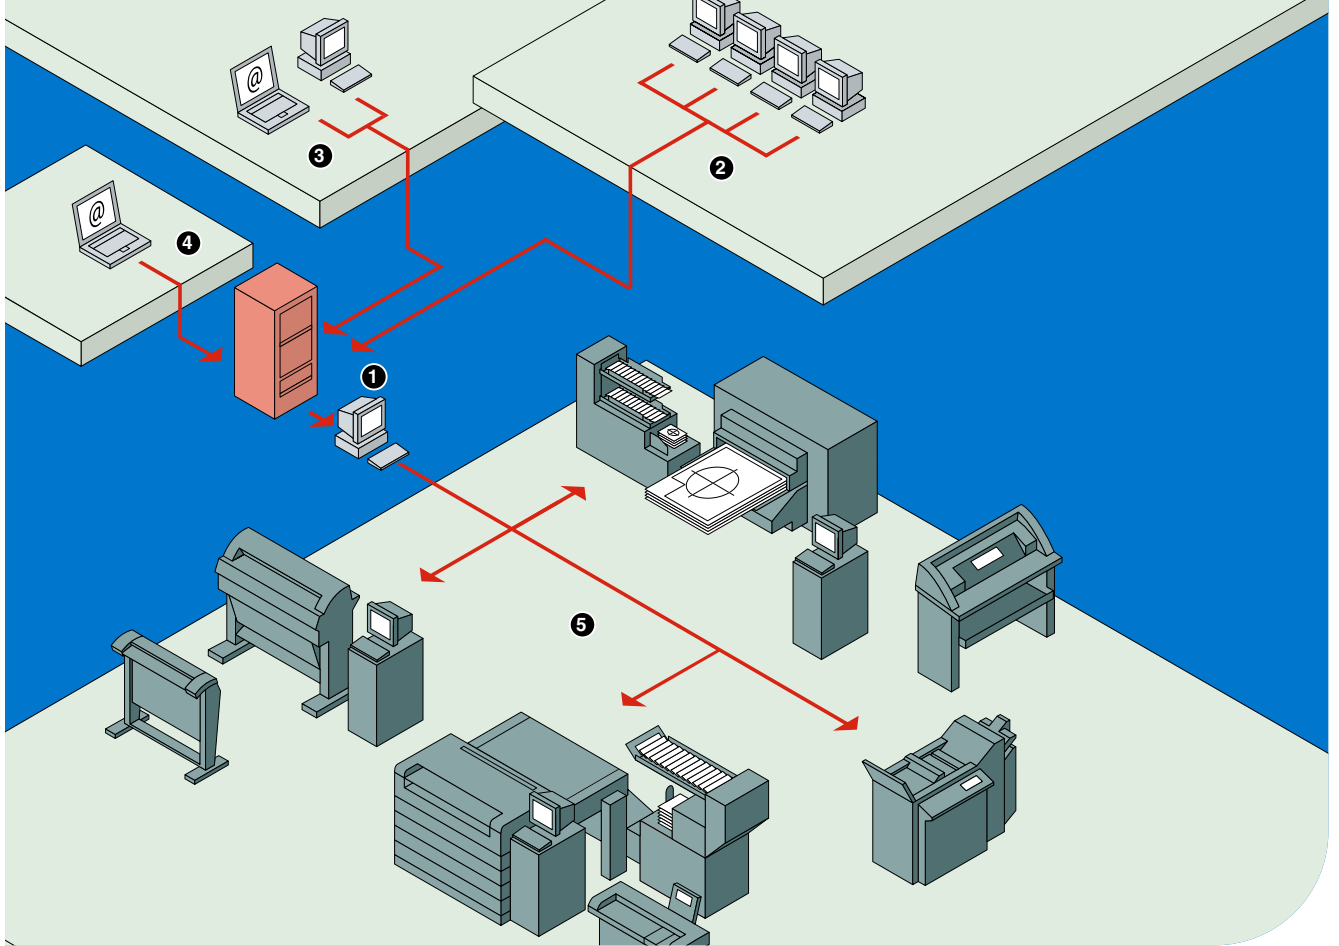

## Océ Print Exec® Pro

### Distributed document output management software

Océ Print Exec® Pro distributed document output management software combines personal freedom with corporate control. It gives you complete visibility of your printing activities. It ensures your printers are optimally utilised. And it makes it easy to distribute technical documents by printing to almost any networked printer. Whatever the format, wherever the location.

With Océ Print Exec Pro you won't need to struggle with managing your printers, even if they are networked company-wide. You'll be sure of uniform, reliable printing on every desktop, whether local or remote. And with Océ printers, Océ Print Exec Pro gives you full access to all their capabilities.

### 4 Printer Environment

Océ and non-Océ  
Black & White and Colour  
Wide format and small format

### Maximise use of your print assets

Are some printers idle while others are over-utilised? With a networked, distributed system, you control all devices and all printing activities across the enterprise. Monitoring the status of all printers and jobs helps you identify and correct problems with just a drag and drop. Jobs can be rerouted to alternate or idle printers. Large jobs can be split over multiple printers for load balancing. Mixed output sizes can be split automatically between wide and small format printers. Printing is done where it is most cost-effective and timely. That means all printers are driven at their optimum speed and capacity.

## IT / Network Administration

*‘Ensuring optimum use of our print infrastructure has always been a problem. That’s why we need a company-wide solution to streamline printing and document distribution’*

### Get consistently high print quality

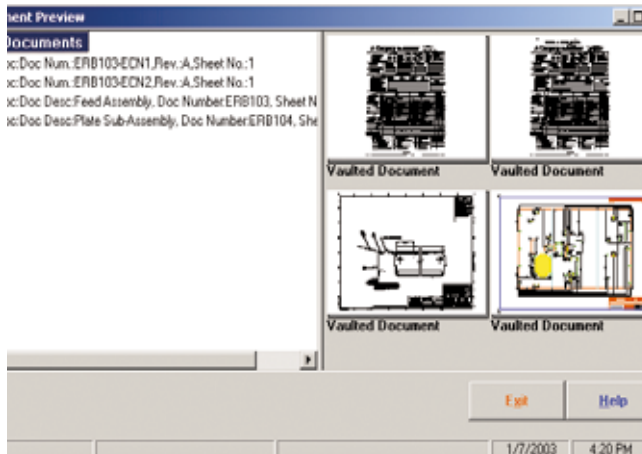

Are your prints correct and complete? Do your printing facilities help or hinder your quality and ISO compliance? With Océ Print Exec Pro, printed documents present complete, consistent and correct technical information every time. Print spooler preprocessing provides output quality that is legible and consistent for every printer. User-selectable stamps and watermarks ensure that printed documents are properly annotated in accordance with your ISO, quality or other similar procedures. Previously plotted output is always available for that next review meeting or ISO audit with job resubmission.

### Drive the flow of information

You may have a variety of CAD, PLM, EDMS and ERP systems handling documents in-house. Océ Print Exec Pro smooths the flow of information from these tools throughout your organization. Embedded print clients, automatic queue-oriented services and APIs give you multiple methods for tying it all together. Of course, our professional services organisation is ready to assist you in selecting and implementing the method best suited for your needs.

## Project Management

*'I need powerfull tools to print & ditribute large sets of documents for multiple recipients'*

### Spend more time on your work

How much time do your engineers waste preparing and executing print jobs? One sheet isn't so bad. What about fifty or a hundred? Do your knowledge workers spend too much time going to the printer and assembling the output? With Océ Print Exec Pro, users create, submit and control print jobs of any complexity directly from their desktop. They can adjust every aspect of their print request. Media size and type, finishing options, even cover pages by set or job are all user-selectable. Typical print settings can be saved in individual profiles. All users get what they requested when they requested it, completely and correctly. The time savings don't stop at the individual user level. Complex document distribution is no longer tedious and time consuming. Distribution lists and remote printing let you print information anywhere, for anyone. Rather than shipping prints from a central location, simply print the documents on local printers. Shipping delays disappear, while recipients receive their documents as fast as their nearby printer can print them.

### Integrate your document output

What is the most cost-effective way to provide uniform printing and distribution services for your employees, suppliers and customers? How can you best handle the various and sometimes complex file formats that must be distributed as a document set? Océ Print Exec Pro provides a single, scalable platform for delivering consistent, reliable and easy-to-use print services on every desktop. Océ supplies your business with a seamless printing pipeline from the desktop to every supported printer on your network. Every step of the printing process is optimised. Organising files and creating print jobs from the desktop is the first step. User profiles and distribution lists let the system 'remember' your print job parameters and complex distribution lists. Queue definitions ensure that prints comply with your processes and standards. Print spooling shortens the time between request and fulfilment, while speeding uniform, high quality prints to every supported printer. The administrator has complete control of all jobs AND all printers. Users can manage their own jobs locally on any authorised printers. All printing assets are maximally utilised. Comprehensive accounting reports closes the loop, ensuring costs are properly allocated and minimised.

## Management

*'I need an integrated solution for my extended enterprise that provides the right documents to the right people at the right time'*

### Deliver bottom-line impact

At Océ, we understand the need for timely and cost-effective output management and document distribution. We can help you save precious time by eliminating unnecessary printing and distribution steps... managing and allocating printing costs... achieving consistent, reliable, high quality printed output... maximising return on investment... handling maximum print loads efficiently. Océ Print Exec Pro is modular, and can change and grow with your business. Integration with third-party applications such as CAD, PDM, ERP or other systems is simple. Effortless, prompt and correct printing, anywhere and anytime, is the result.

### East cost management and allocation

Having trouble reconciling print usage with your print users or dealing with cost overruns? Océ Print Exec Pro tracks and reports which documents were printed, who requested them and when they were printed. The range of built-in accounting reports helps you accurately determine and allocate printing costs. You can charge those costs to the users, departments, projects or other groups using your printing facilities. Costly and time-consuming printing errors are minimised as print users view their files online before printing. Océ Print Exec Pro instantly distributes single or complex document sets to multiple recipients at numerous locations. Printing remotely near end-users combines real-time document delivery with savings on shipping cost.

# Beyond the Ordinary

## Printing for Professionals

Building a sustainable business has always been one of our core business principles. We do this by developing products and services that add value to the document processes of our customers, while minimizing environmental impact. And we conduct our business activities in a socially responsible manner aimed at preventing health, safety and environmental risks.

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format colour for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
